POS Acquiring as a Service

Scale Up Your Transactions
and Boost Efficiency

Transform your transaction management for increased cost efficiency

Our POS Acquiring service, suitable for PSPs, merchants, or TPPs, allows you to concentrate on your core operations while BPC manages your payment infrastructure. Leverage BPC's capabilities to remotely manage and operate terminal EFT/POS networks, ensuring seamless transactions, including purchases, tip adjustments, cashback, reversals, refunds, DCC, utility payments, and more.

Enhance your network for optimised performance

Experience a seamless terminal registration process, which can be initiated during merchant onboarding or at any subsequent time. Connect any type of terminal - Classic EFT/POS, Smart POS, mPOS, or SoftPOS. Once registered, terminals are immediately available for transaction processing. Configure rules, addresses, statuses, fees, currency acceptance, connectivity attributes, and other parameters at any level of your merchant hierarchy.

How it works...

From Tap-to-Phone functionality that lets merchants transform their smartphone into a payment terminal, to our state-of-the-art web-based portal that streamlines information for merchants, our service is designed to make every aspect of POS acquiring easier and more efficient. We also ensure clean, up-to-date merchant accounts with a built-in reconciliation tool, and offer 24/7 funds transfers to merchants and their customers.
