Payment Orchestration

Become a Payments Maestro

Manage diverse payment flows with precision and agility with BPC's Payment Orchestration

Navigating the complex landscape of today's retail businesses and merchants' payment processes can be challenging, especially for those operating across different countries. With varied payment methods and currencies, ensuring a seamless customer payment experience is a difficult feat. BPC's Payment Orchestration provides a unified checkout experience through a centralised platform. With our solution, businesses can confidently manage multiple payment options, optimise diverse payment flows, and handle acquiring rates efficiently.

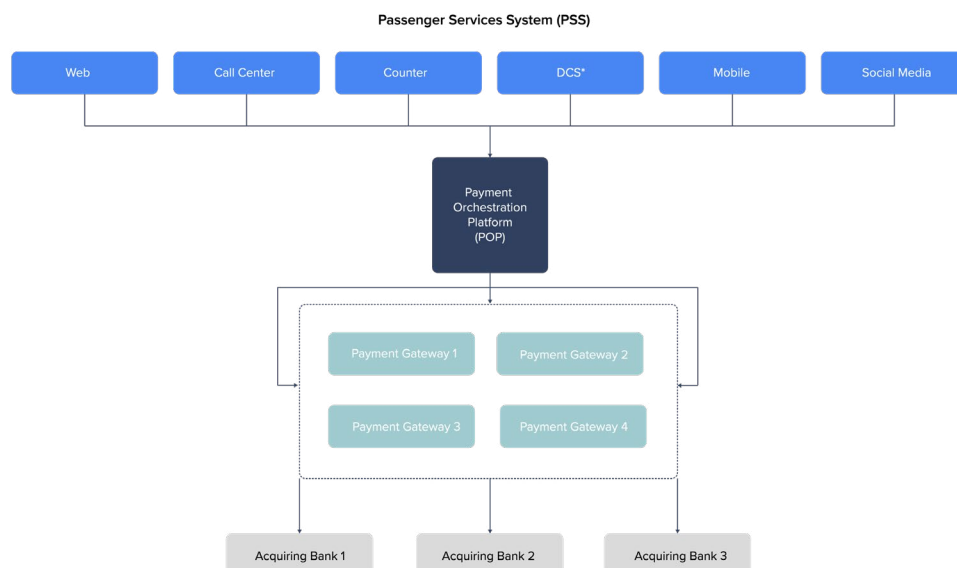

Become the conductor of your payment orchestra

Utilise the combination of technology and data analytics to stay competitive and fuel revenue growth. With SmartVista Payment Orchestration, you can streamline your payment processes, increase customer satisfaction, and bolster your bottom line.

How it works...

- The solution provides a unified, customisable platform that enables businesses to manage multiple payment options effectively.
- Offer your customers payments in local currencies through familiar wallets, conducting currency conversion at the merchant level, not at the PSP.
- Speed-up checkout experience and reduce cart abandonment rates
- Manage global acquiring rates: Handle acquiring rates centrally, helping you extend your reach and venture into new markets.
- Customise payment options: Decide what currency or payment method your users see based on their location, transaction value, or other parameters.
- Reduce costs & increase flexibility: Avoid the expenses of developing, establishing, and maintaining separate integrations with various payment service providers.

Key benefits of SmartVista Payment Orchestration

- › **Single integration with any number of PSPs and acquirers**
- › **Library of over 150 pre-approved PSP integrations**
- › **Smart routing and automated retries of payments**
- › **Reduced acquiring fees through optimised processing**
- › **PCI compliance**
- › **Automated payment flows and payment traffic distribution**
- › **Support for 3DS**
- › **Cloud deployment on hardware, Oracle, or Amazon AWS**

Financial institutions...

- Become a part of the BPC processing suite
- Reduce the costs associated with numerous separate integrations
- Launch orchestration quickly and easily
- Improve customer satisfaction

For end users...

- Pay using preferred payment methods or wallets
- Enjoy a smoother checkout experience
- Benefit from real-time payment analytics
- Enjoy a faster, more satisfying checkout experience

Power your transactions with BPC

Start benefiting from our payment orchestration service alone or as part of a broader technology platform and gain the potential to make the most of every transaction with the right tools and technology. It's one thing to use technology to power your transactions; it's another to harness its full potential.

BPC's experienced team understands exactly how to bridge real life and digital, and our technology is proven, consistent, and always forward-thinking.

About BPC

Founded in 1996, BPC has transformed over the years to deliver innovative and best in class proven solutions which fit with today's consumer lifestyle when banking, shopping or moving in both urban and rural areas, bridging real life and the digital world.
