# QR Payments

Rising Star of Payments

# Widen your offerings and boost your revenue with SmartVista QR Payments

The payments landscape becomes richer by the day, and keeping up with payment options drives success for both financial institutions and merchants/vendors.

The worldwide growth of QR-enabled payments has opened up opportunities for banks, technology providers, and other payments organisations. Eliminating the need for an expensive EFT/POS terminal means an easier way for smaller vendors and service providers to get paid.

# Low-cost, high connectivity

Digital and card payments give consumers a quick and convenient way to pay, but the cost of POS devices mean some small businesses can miss out. QR payments offer a low-cost and secure way for everyone to get paid, no matter their tech budget.

## How it works...

- The SmartVista QR Payments solution accepts all types of QR codes.
- It meets local, international, and EmvCo standards.
- The solution facilitates full settlement and unified settlement services for small merchants across all eWallet providers and payment schemes
- Merchants benefit from an easy way to offer their own QR Payment options.
- The API allows the additional integration of many different channels, from websites and in-app payments to a cash desk.

# Key benefits of QR Payments

- › **Ability to use various payment instruments**
- › **Self-service portal for merchants for QR generation, terminal management, reporting, statements, applications, claims**
- › **Pay-out and unified settlement service for small merchants across all eWallet providers/payment schemes**
- › **Lower interchange rates and least cost routing capabilities**
- › **White label mobile application with dynamic QR, NFC capabilities**
- › **API for different channels integration including websites, in-app payments, cash desk.**
- › **Integration with eWallet providers.**
- › **Merchant Loyalty, Microloans, Merchant eWallet services**
- › **Fraud prevention and risk management**

## Financial institutions...

- Are protected thanks to sophisticated fraud and risk management
- Offer a richer, more supported service to merchant customers
- Enjoy easy API integration

## Customers...

- Are able to focus on delivering rich user experience
- Benefit from a comprehensive merchant portal
- Increase their attractiveness to customers
