Billing & Invoicing

Staying Accurate yet Flexible

Give your clients the ability to supercharge their receivables with BPC's SmartVista solution

Getting paid is a vital driver of growth, no matter what industry your clients are in. But the administrative effort that goes into it – from invoicing to reconciliation – can be significant. By delivering the tools to streamline the process while consolidating with existing accounting packages, you'll be helping to ease that burden.

Delivering speed and accuracy

Offering the most up-to-date merchant administration and portal tools means your clients benefit from faster, more accurate billing and invoicing. Invoices can be generated automatically, reconciliations are a breeze, and payment statuses are always accessible and up-to-date.

How it works...

- Financial institutions can either deploy SmartVista as a standalone system or integrate it into existing systems.
- BPCs Merchant and Back Office tools consolidate easily with existing accounting packages.
- Multiple payment channels can integrate billing and invoicing for seamless payment experiences.
- Merchant administration tools allow the use of custom templates, and makes it easy for invoice data to be imported.
- Invoices can be automatically emailed to customers with easy-to-use click and pay buttons.
- When invoice payments are received, they're immediately checked to ensure regulations are met and risks mitigated.

GM

Invoice from Gift Markets
Billed to Stacy Lense
Invoice ref #08765890
