# Automated Fare Collection

Keep on Moving

# Drive economic growth and deliver the smoothest customer experience with BPC's O-CITY Automated Fare Collection

Mobility is key to economic growth, and delivering transport infrastructures that give people easy access to that mobility benefits everyone – from governments to transport operators to the public.

Being able to seamlessly travel through areas, using multiple modes of public transport from different operators, is the dream for commuters. And if there's a way to offer just that while saving operators and governments/municipalities time and money, it's truly win-win.

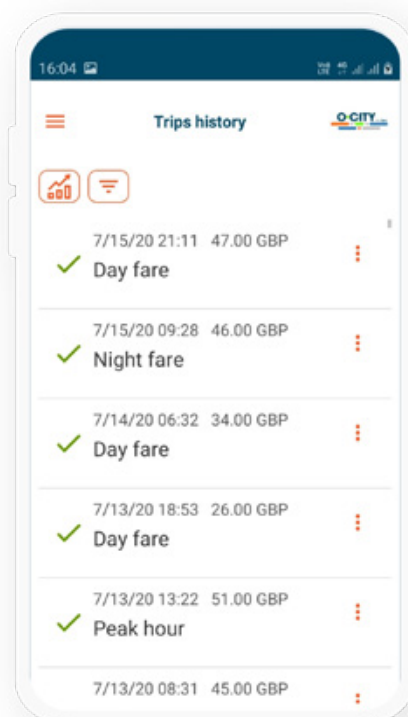

# The future of ticketing systems

Traditional ticketing systems are often cash-based and, even if digital, don't usually offer the flexibility and transparency needed to benefit every party involved. Automated Fare Collection offers a frictionless, accessible way of dealing with transport ticketing.

## How it works...

- The solution is hardware agnostic and can quickly and easily be installed on existing infrastructure.
- Commuters can pay for their fares from a single account through the app, link their card to it, and top up anywhere anytime using cards, bank transfers, smartphones, or cash.
- Commuters can use devices such as smartphones and contactless cards, avoiding the need to visit a ticket office.
- Fares are managed centrally to ensure best prices.
- The solution isn't tied to specific public services, so implementation costs can be shared between transport operators if needed.
- Validators can be installed in transport vehicles and stations or at the entrance of public buildings.
- Turnstiles, gates, and information kiosks can be connected to those validators and ticket inspectors can be equipped with mobile devices.
- Ticket acceptance devices are managed centrally, along with equipment diagnostics.

# Key benefits of O-CITY Automated Fare Collection

- › Encoding, processing, and distributing tickets electronically increases efficiency
- › Centrally managed ticketing system
- › Reduced ticket fraud
- › Reduced expenditure on infrastructure servicing
- › Unified e-ticketing system for access to various public services
- › Transparent settlement with transport and other services
- › Reduce fare evasion and free-rider problems
- › Loyalty programs, discounts and rewards

## Transport operators...

- Reduce costs associated with paper tickets and cash handling
- Benefit from a dedicated central portal

## Passengers...

- Benefit from a seamless, rich customer experience
- Pay from a single account using payment methods of their choice

## Governments and municipalities...

- Gain easy way to manage and allocate subsidies
- Improve accessibility and attractiveness of services

# Power your transactions with BPC

Start benefiting from O-CITY Automated Fare Collection alone or as part of a broader technology platform and gain the potential to make the most of every transaction with the right tools and technology. It's one thing to use technology to power your transactions; it's another to harness its full potential.

BPC's experienced team understands exactly how to bridge real life and digital, and our technology is proven, consistent, and always forward-thinking.

# About BPC

Founded in 1996, BPC has transformed over the years to deliver innovative and best in class proven solutions which fit with today's consumer lifestyle when banking, shopping or moving in both urban and rural areas, bridging real life and the digital world. With 350 customers across 100 countries globally, BPC collaborates with all ecosystem players ranging from tier one banks to neobanks, Payment Service Providers (PSPs) to large processors, ecommerce giants to start-up merchants, and government bodies to local hail riding companies. BPC's SmartVista suite comprises cutting-edge banking, commerce and mobility solutions including digital banking, ATM & switching, payments processing, card and fraud management, financial inclusion, merchant portals, transport and smart cities solutions.
