# Integration Platform

Fast lane access to integration

# BPC's SmartVista Integration Platform gives you fast lane access to integration

Implementing new systems at financial institutions means moving quickly and correctly. In a constantly evolving, highly regulated environment, system integrations have to work hard and smart to keep up with the pace.

A specialist integration platform means complex integrations are streamlined and simplified, combining a reliable payments infrastructure with room for innovation.

# Designed specifically for payment system integrations

Why rely on a generic enterprise integration tool, when SmartVista delivers an integration platform built on years of payments expertise and trusted by well-known financial institutions and e-governments across the world? Ideal for driving banking and payments integration projects, the platform uses the highest security standards with a strong focus on regulatory compliance.

## How it works...

- Financial institutions and integration partners orchestrate integration activities through a single 'smart' service bus.
- Users design their integrations through a visual toolkit, with built-in connectors to connect to service providers, core banking systems, channels, ecommerce, switches, payment networks, retailers, utility providers, and HSMs.
- Projects get a head start thanks to the platform's ready-to-use storage, processing, transformation, bulk and debulk files.
- Product development and delivery are done through established CI/CD pipelines, increasing the speed of deployment, reducing dependencies, and creating better workflows.

# Key benefits of SmartVista Integration Platform

❯ **A 'smart' service bus**
❯ **Low-code approach in building new services**
❯ **Built-in graphical UI for configuration**
❯ **Tools for flexible configuration and integration**
❯ **Collection of open APIs and web services**
❯ **Payments specific protocols and connectors (incl ISO8583, IS20022, XML, Swift MT/MX)**
❯ **Flexibility in building custom functionality**
❯ **Out-of-the the box integration with SmartVista products**
❯ **Complex message handling logic**
❯ **Batch bulk/debulk**
❯ **PA-DSS certified**
❯ **Real-time and batch messages processing modes**
❯ **Horizontal scalability and high- performance engine**
❯ **Database independence**
❯ **Tech stack based on open standards and mature open source software**

## Financial institutions...

Simplify siloed systems
Get business flows that are adapted to their needs
Achieve fast time to market

## Implementation teams...

Get to focus on what really matters
Benefit from built-in formatters and connectivity
Can combine rapid implementation with best practice and compliance

# Power your transactions with BPC

Start benefiting from SmartVista and gain the potential to make the most of every transaction with the right tools and technology. It's one thing to use technology to power your transactions; it's another to harness its full potential.

BPC's experienced team understands exactly how to bridge real life and digital, and our technology is proven, consistent, and always forward-thinking.

# About BPC

Founded in 1996, BPC has transformed over the years to deliver innovative and best in class proven solutions which fit with today's consumer lifestyle when banking, shopping or moving in both urban and rural areas, bridging real life and the digital world. With 500 customers across 140 countries globally, BPC collaborates with all ecosystem players ranging from tier one banks to neobanks, Payment Service Providers (PSPs) to large processors, ecommerce giants to start-up merchants, and government bodies to local hail riding companies. BPC's SmartVista suite comprises cutting-edge banking, commerce and mobility solutions including digital banking, ATM & switching, payments processing, card and fraud management, financial inclusion, merchant portals, transport and smart cities solutions.
