Tap to Phone

One Tap Payments with SoftPOS

Discover the future of accepting contactless payments for businesses of all sizes

Customers today expect fast, secure, and flexible payment options—whether through contactless cards, digital wallets, or QR codes. However, for many small and medium-sized businesses, the cost of traditional POS terminals and complex integration make it difficult to offer a smooth payment experience.

Tap to Phone eliminates these barriers by turning any Android smartphone into a secure payment SoftPOS device—no additional hardware required. Merchants can instantly accept contactless payments, transforming their smartphones into cost-effective, full-service payment solutions.

By offering SoftPOS, acquirers can empower merchants to accept all contactless payments, delivering an efficient and convenient payment experience.

Empower your merchant customers

No matter the business size or industry, SmartVista Tap to Phone (SoftPOS) enables merchants to turn any Android smartphone into a business hub. With no need for specialized POS devices or terminals, merchants can save money while expanding their payment acceptance capabilities.

Beyond payments, merchants gain access to value-added services such as loyalty programs, BNPL (Buy Now, Pay Later), inventory management, and e-invoicing. This helps businesses increase sales, enhance customer retention, and optimize operations—all while ensuring secure transactions.

How it Works

- Tap to Phone can transform any Android NFC-enabled smartphone into a payment acceptance device.
- Tap to Phone offers digital onboarding, payment choice, receipt options, void and refund, terminal and user management, analytics, and reporting on all transactions.
- Merchants can accept all payment methods: cash, contactless EMV® cards (Visa, Mastercard, domestic schemes), NFC devices (smartphones, smartwatches, tablets), QR codes, and BNPL
- It's certified for international schemes and domestic payment schemes, ensuring compliance anytime and anywhere.

Key benefits of Tap to Phone

- Eliminates the need for external POS terminals
- Certified by international schemes and domestic payment schemes
- Quick digital onboarding for merchants
- Supports multiple payment methods (cash, cards, NFC, QR codes, wallets, and BNPL)
- Provides transactions management including voids, refunds, receipt options, users and terminal management
- Offers advanced analytics and transaction reporting
- Easily integrates with third-party systems
- Ensures data protection with security features

Financial institutions...

- Can ensure full compliance with international and domestic payment schemes
- Expand acquiring opportunities with both SoftPOS and mPOS solution
- Offers more value with analytics, reporting and third-party integration

Merchants...

- Benefits whether they are a microbusiness or larger retailers
- Can reduce costs while accepting flexible, secure payment options
- Gain an essential tool for their business with added services

Customers...

- Get a faster, frictionless contactless customer experience.
- Make transactions instantly with a simple tap
- Benefit from secure, smooth payment processing
