# Tap to Phone

'One Tap' Payments using SoftPOS

# Discover the future of accepting contactless payments, for businesses of all budgets

Today's customers expect the convenience of contactless payments, but for many merchants, particularly small and medium sized ones, the outlay for payment devices that accept contactless may be too much. Tap to phone offers a way to accept contactless payments using only a smartphone, by converting it to a payment SoftPOS device.

Being able to transform a regular device into a full-service payment channel means cost-savings and convenience for merchants of all shapes and sizes. Acquirers can empower their merchants to accept all contactless payment methods.

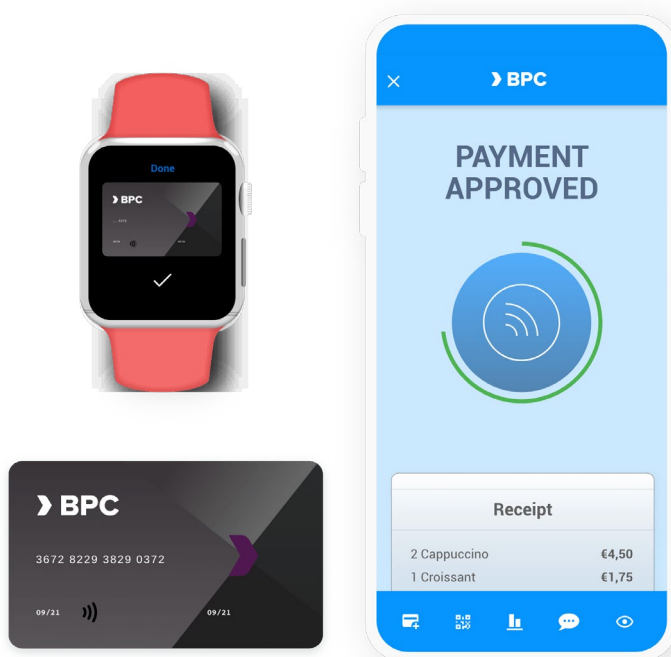

# Empower your merchant customers

No matter the business, SmartVista Tap to Phone lets merchants turn their smartphone into a business hub. With no need to shell out on specialist devices and EFT/POS terminals, they'll be saving money as they make money.

## How it works...

- Tap to Phone can turn any Android NFC smartphone into a payment acceptance device.
- It integrates seamlessly with any front-end or Switch and any CRM by open APIs and SDKs.
- Merchants can accept any contactless payment method: contactless EMV® cards, NFC devices such as smartphones, smartwatches, tablets, and QR codes
- Tap to phone manages digital onboarding, any payment choice, receipt options, void and refund, terminal and user management, analytics and reporting on all transactions.
- It's certified for international schemes, so compliance is guaranteed anytime and anywhere.

# Key benefits of Tap to Phone
